

PROJECT NAME:

Renal Cell Carcinoma Service Redesign Project between UHB NHS Trust, Queen Elizabeth Hospital site, Birmingham and Ipsen.

TIME FRAME: April 2019 - March 2021

JOINT WORKING PROJECT SUMMARY:

The aim of this project was to develop a pharmacist led care pathway for renal cell carcinoma (RCC) patients on oral VEGF inhibitors, whereby pharmacists reviewed patients on treatment.

OUTCOMES ACHIEVED BY THIS PROJECT:

- Delivery of an evidence based patient pathway.
- High patient and clinician satisfaction with the clinic service.
- The business case to continue having a pharmacist in renal cell clinics was approved.
- Allowed the trust to scope future roles with the potential to extrapolate to other therapy areas.

PROJECT COMPLETED 31ST MARCH 2021
